English is an International language

is used by the people all over the world

The world needs a common language in order to communicate with each other

Without communication there will be no sharing of knowledge or ideas among the people

The English does this job of connecting people from different cultures & diversities which would finally lead to a wide range of spread in all aspects

We can see, English does not only join the people from different countries, but also helps within the states of a country

Learning English, one can be comfortable with communicating & dealing with other people & even understanding all kinds of activities all over the world.

The Government has made the English language one of the subjects in the schools, so that the students can learn it from the

• talking about the students, learning English language helps them
many kinds. They can learn international subjects, watch movies,
different languages, communicate with the people effectively and
attract the interviewers & people around, and even overcome competition.

Group Discussion

Importance of English

1. T. Varakumari
2. MD. Sadikha
3. K. Tirumula
4. O. Salomi
5. V. Nagasri
6. Sk. Muntaj Begum
7. B. Sandhya
8. K. Nagalakshmi
9. K. Swathi
10. T. Kavya

Main points:-

English plays a vital role in communication to other countries.

Translation of language to other countries to understand everyone's language. because of it is a world language.

To get jobs, foreign countries, Competitive Exams.

* To know the unknown things happened in the past. through youtubes

- * It is used for operating the computer to mails to others.
- * It will be useful to understand the Hospital information.
- * It also useful for announcements in [Railways Communities]
- * To communicate with high knowledged persons.
- : To get information about the Route Maps.
- * News channels, To visit the films, speeches.
- * Treated to be a Honourable persons in the society.
- * It will helps the society to move forward

"English is the best Medicine to move the world easily"

Group discussion

Now a days medicines became part and parcel of our life. The cost of the branded medicines is too high compared to generic medicines. So Government has launched generic medicines which was of the same composition of branded medicines at affordable and low cost.

Due course of time many misconceptions arised about this generic medicines.To create awareness and to avoid the myths about generic drugs we the department of chemistry have arranged a group discussion on " How will you justify the generic drugs are good compared to the branded drugs". 26 members are participated in group discussion .

Generic medications are a chemical copy of the original brand, with the same active ingredients. Generics are also available at a lower cost than brand-name medications. In fact, generic drugs cost 85 percent **Trusted Source** less than the brand version on average.

FDA gives patent and exclusivity **Trusted Source** protection to brand manufacturers to allow them to profit from their innovation and research for several years. During this time, no generics can compete with the brand.

Once the patent has expired, generics can enter the market through a shortened FDA approval process. Generic medications need to meet the same quality, safety, and effectiveness standards as brands.

Generic medications go through testing for quality, strength, purity, and potency to show effectiveness before approval by FDA. They must have the same active ingredient and provide the same benefits.

There are a few differences, however. Generic and brand medications don't look the same. Generics may have slightly different inactive ingredients (fillers, binders, flavors, etc.). These don't affect how the medicine works.

Many people have concerns about switching to generics and prefer brands. Some doctors also have concerns with certain medications. To be clear, this is a preference. These concerns might include:

- worsening of symptoms or condition
- side effects
- adverse reactions

- effectiveness
- safety
- quality

There are no laws that restrict the substitution of any FDA-approved generic or brand medication. It's up to you and your doctor to decide what's best for you.

You and your doctor can discuss if a brand or generic is the best option for you based on your comfort and budget. If you switch from a brand to a generic, you may need closer monitoring to make sure the medication is suitable for you.

Miss K.Allen Christina explained very clearly about the differences between generic drugs and branded drugs and how they works effectively.

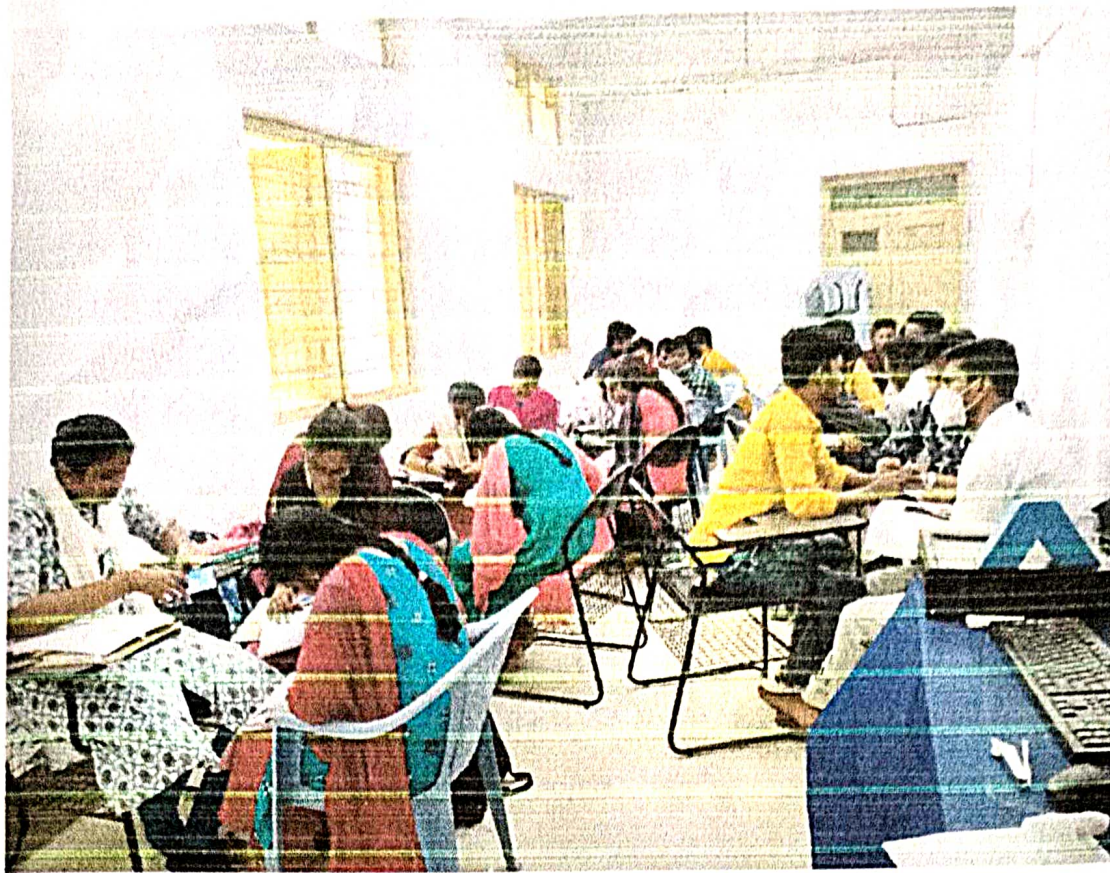

Mr.K. Koti surya explains the misconceptions and myths of generic drugs. He told that quality is most important. Branded drugs possess more quality because of its high cost.

Mr.M.Rajasekhar explains that how does the generic drugs works effectively to the system.

All the students are actively participated in this discussion.After this discussion I can conclude them with facts against their myths.So that they can able to guide their elders in their family and neighbours which leads to minimum savings in their expenses.

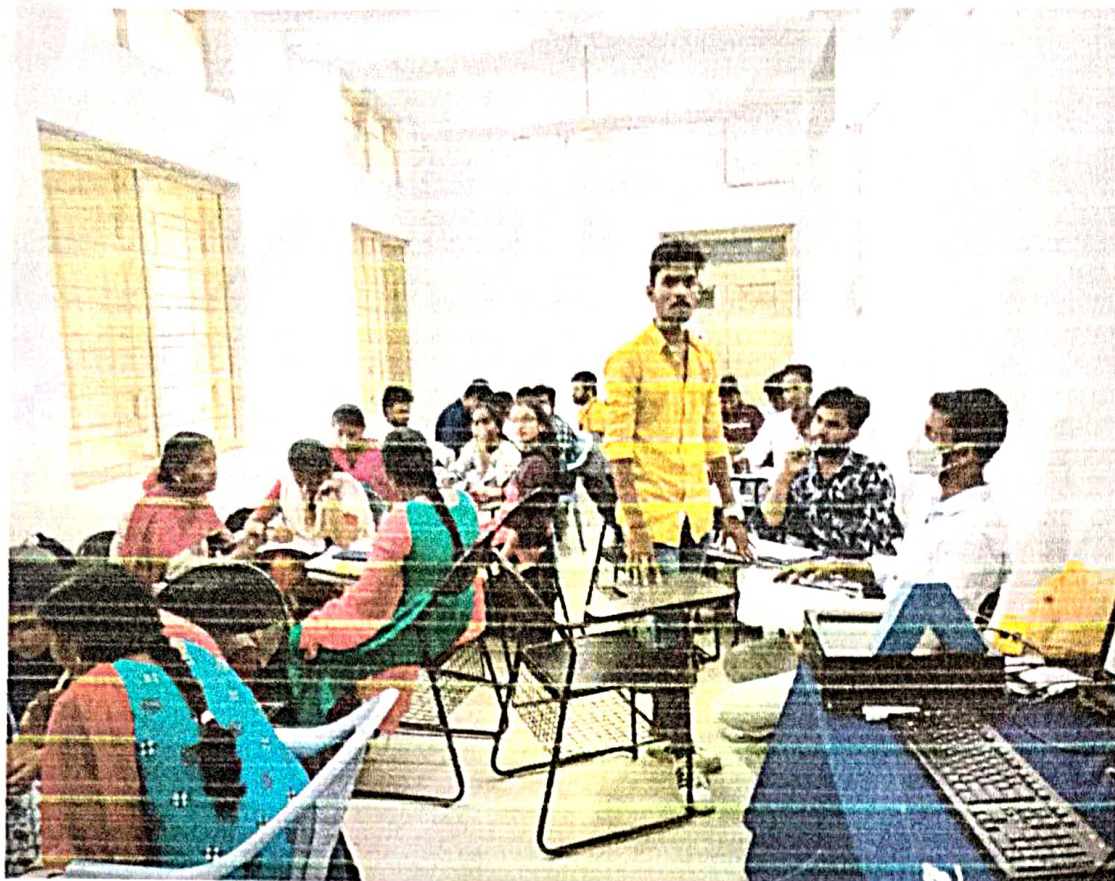

Students are preparing for group discussion

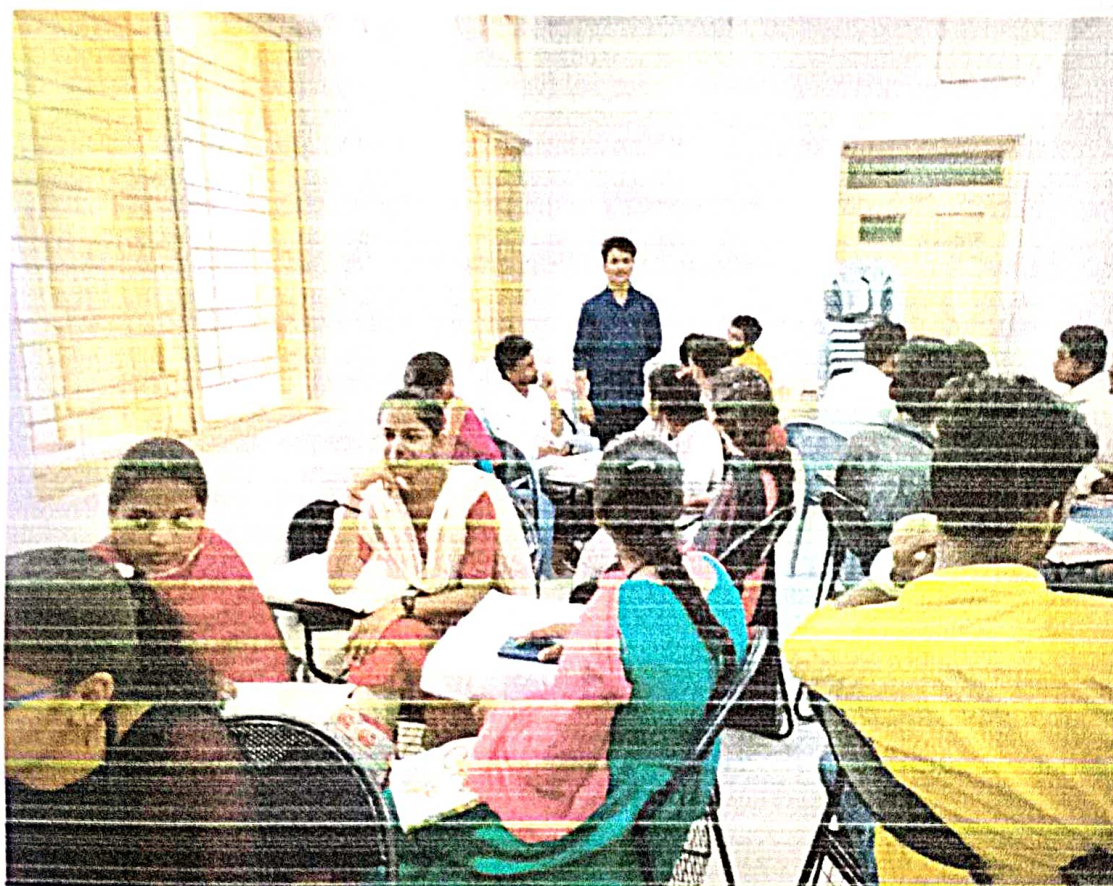

Students are discussing with one another

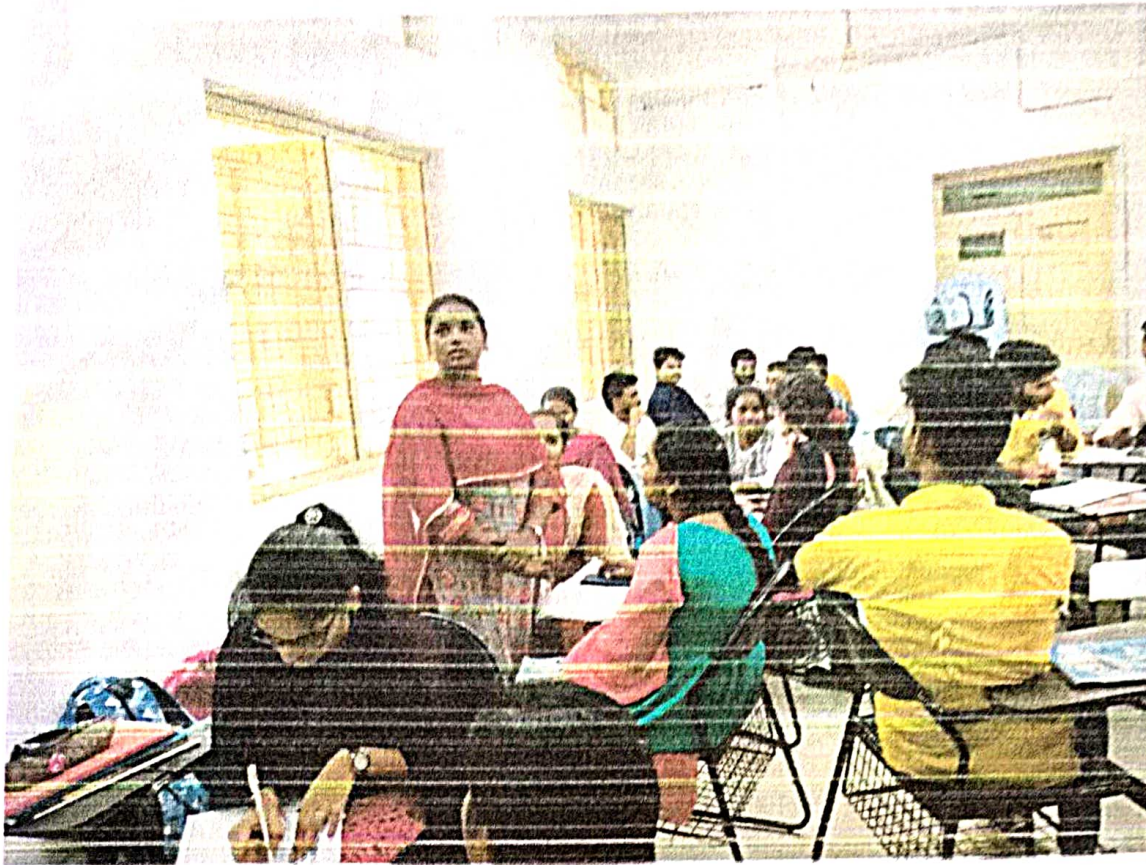

Miss.K.Allen Christina,II B.Sc.A,Z.C is explaining the differences between generic drugs and branded drugs

Mr.K.Koti Surya,II B.Sc.B.Z.C is explaining about efficacy of generic drugs.

Mr.T.Kiran Jyothi,II B.Sc.A.Z.C is explaining about the merits of generic drugs.

Miss.K.Lakshmi,II B.Sc.M.P.C Is Participating in the group discussion

Mr.N.Prabhas,II B.Sc.A.Z.C is clarifying their doubts on generic drugs.

[Established in 1966, Re-Accredited with 'B' by NAAC]

Affiliated to Acharya Nagarjuna University

Group : A

Topic Name : SQL Commands In DBMS

Conclusion :

- The breadth and scope of the SQL commands provide the capability to create and manipulate a wide variety of database objects using the various CREATE, ALTER, and DROP commands.
- Those database objects then can be loaded with data using commands such as INSERT. The data can be manipulated using a wide variety of commands, such as SELECT, DELETE, and TRUNCATE, as well as the cursor commands, DECLARE, OPEN, FETCH, and CLOSE.
- Transactions to manipulate the data are controlled through the SET command, plus the COMMIT and ROLLBACK commands. And finally, other commands covered in this chapter include those that control a user's access to database resources through commands such as GRANT and REVOKE.

T.R.R. GOVERNMENT DEGREE COLLEGE

Kandukur, Prakasam District, Andhra Pradesh, Pincode: 523105

[Established in 1966, Re-Accredited with 'B' by NAAC]

Affiliated to Acharya Nagarjuna University

Group : B

Topic Name : Structures in C

Conclusion : Structure is a user-defined datatype in C language which allows us to combine data of different types together. Structure helps to construct a complex data type which is more meaningful. It is somewhat similar to an Array, but an array holds data of similar type only. But structure on the other hand, can store data of any type, which is practical more useful.

T.R.R. GOVERNMENT DEGREE COLLEGE

Kandukur, Prakasam District, Andhra Pradesh, Pincode: 523105

[Established in 1966, Re-Accredited with 'B' by NAAC]

Affiliated to Acharya Nagarjuna University

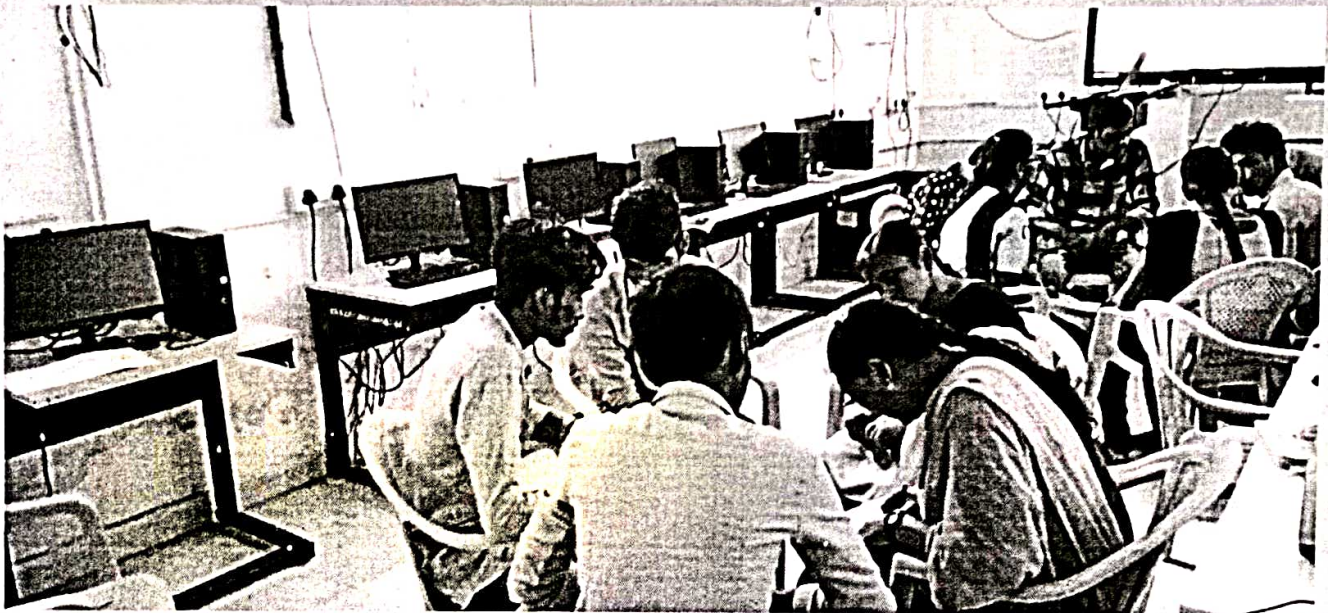

Group : C

Topic Name : Functions in C

Conclusion :

- Functions are a set of reusable codes which perform a specified task on the parameters passed to them when they are called.
- Structure-function can be used to write code effectively.
- The structure can be passed as a parameter to the function.
- An entire structure can be passed to a function, or individual members of the structure can be passed into the function.

Affiliated to Acharya Nagarjuna University

Name of the Student : P.Pratyusha

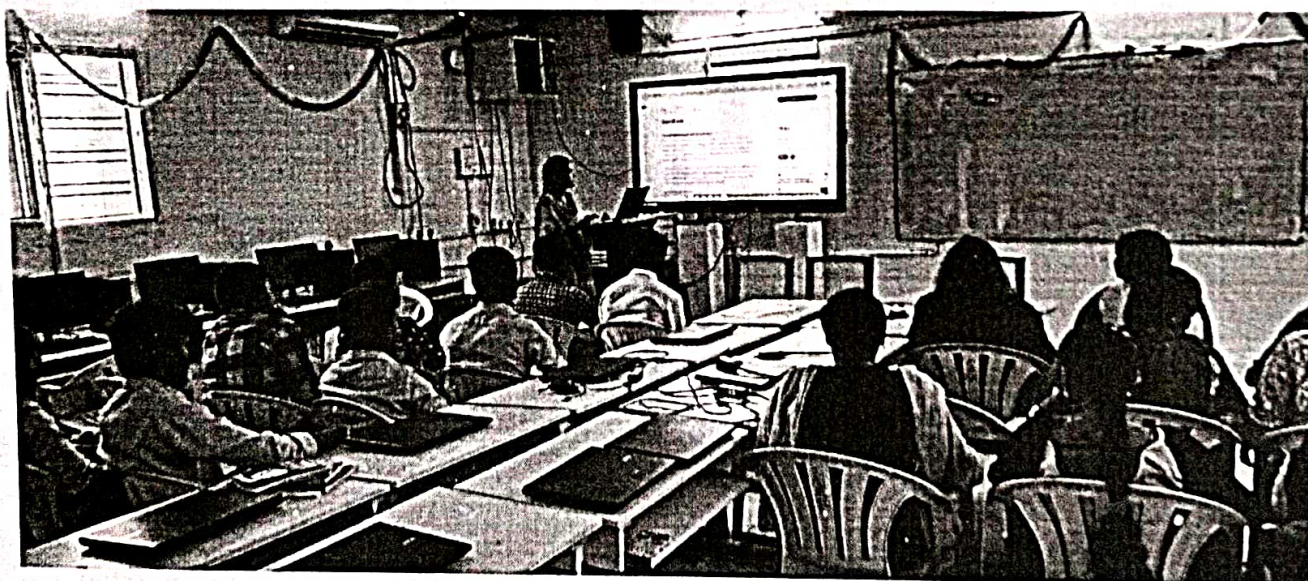

Year & Group : II -B.Sc(MPCS)

Topic Name : Basic Building Blocks in DBMS

No. of Students Participated: 21

Abstract :

- A data model is a structure of the data that contains all the required details of the data like the name of the data, size of the data, relationship with other data and constraints that are applied on the data. It is a communication tool.
- A data model is essential in order to store the database in a sorted manner. It will provide the interaction between the system analyst, designer and application programmer. It improves the understanding of designing of the database in which the organization is interested.

Name of the Student : D.Sudhakar

Year & Group : II -B.Sc(MPCS)

Topic Name : EER Models in DBMS

No. of Students Participated: 21

Abstract :

The enhanced ER model is an abbreviation for Enhanced Entity-Relationship (EER) model. As you know, the entity-relationship (ER) model is a pictorial illustration of the relationship between various entities of a domain. In the case of a large amount of data with multiple interrelated entities, the ER diagrams become complex and tough to interpret. For such cases, the need for enhancement in the ER model was observed, and thus, the EER model was designed.

The EER model is an enhancement or extension of the ER model. EER was designed to represent complex database problems of engineering, telecommunication, geographic information systems, and complex software systems. EER diagrams are used for modeling data in Database Management System (DBMS).

GROUP DISCUSSION

DEPARTMENT OF Political Science

T.R.R Government Degree College, Kandukur

Department of Political Science

**Group Discussion on
Abolition of Special Status
To Jammu and Kashmir**

Date: 21-08-2019

Abolition of Special Status to Jammu and Kashmir

Background: Government of India issued a Presidential Order on 05/08/2019 to suspend the special status to Jammu and Kashmir and it passed in the Parliament on 31/10/2019 and became an act.

In this context Department of Political Science organised a Group Discussion on "Abolition of Special Status to Jammu and Kashmir".

Objectives of this Programme:

1. Students can understand the Special Status provisions enjoyed by the Jammu and Kashmir.
2. Students can understand about Indo Pak relation in view of Abolition of Article 370.
3. Students can have idea about peculiar conditions prevailed in this area.

Outcomes of this Programme:

1. Because of this discussion students learned about various aspects of Jammu and Kashmir issue
2. Students have clear idea about how terrorism spread in Jammu and Kashmir.

Impact of Abrogation of Article 370 On J&K

After the constitutional changes and reorganization of the erstwhile State of Jammu-Kashmir, the Union territories of Jammu-Kashmir and Ladakh have been fully integrated into the mainstream of the nation. As a result, all the rights enshrined in the Constitution of India and benefits of all the Central Laws that were being enjoyed by other citizens of the country are now available to the people of Jammu-Kashmir and Ladakh.

The change has brought about socio-economic development in both the new UT's i.e. UT of Jammu-Kashmir and the UT of Ladakh. Empowerment of people, removal of unjust Laws, bringing in equity and fairness to those discriminated since ages who are now getting their due along with comprehensive development are few of the important changes that are ushering both the new Union Territories towards the path of peace and progress.

With the conduct of elections of Panchayati Raj Institutions such as Panches and Sarpanches, Block Development Councils and District Development Councils, the 3-tier system of grassroot level democracy has now been established in Jammu and Kashmir.

This was stated by the Minister of State for Home Affairs, Shri G. Kishan Reddy in a written reply to question in the Rajya Sabha today.

DEPARTMENTAL ACTIVITIES 2020-2021

ACTIVITY REPORT

Activity: Group discussion	Date: 23.11.2021
Topic : Health or Wealth	
Venue: BOTANY LAB	participants: BZC 3rd YEAR

As a part of Academic activities our Botany Department organised a group discussion on Health or Wealth topic to the final year students. At this age the students give least importance to the health. May be their physical fitness is the reason behind this. The same student after crossing 30 is facing so many health problems. There is a mad rat race for all the citizens in the world to acquire the wealth. People are earning at the expense of their health. After earning they are spending too much for their health in hospitals due to ill health. Understanding situation to make the students aware of the importance of the sound health our Botany department organised the group discussion program on Health or Wealth topic. Unquestionably Health got more priority in their view point.

Organising the Group Discussion:

9. All the students are made in to two groups (Group A and Group B)
10. The topic is given just half an hour before the program starts.
11. The groups are allowed to discuss among themselves and write their view point on piece of paper.
12. Later the Group leader will present his view points before the jury.

Group A

1. J. Neelima
2. Ch. Praveen
3. D. Meghana
4. M. Mahindra
5. A. Naveen

Group B

1. Sowjanya
2. Shaik Jameema
3. Vengaveni
4. Mahaboob Jani
5. D. Prasanna
